Accessible Coverage of the New Paradigm

NEW!

Handbook of Control Room Design and Ergonomics A Perspective for the Future, Second Edition

Toni Ivergård
Bangkok, Thailand
Brian Hunt
College of Management,
Mahidol University,
Bangkok, Thailand

Theoretical and Practical Considerations for Industrial and Business Environments

First published two decades ago, the first edition of **Handbook of Control Room Design and Ergonomics: A Perspective for the Future** became a benchmark for the field. Current-day process control encompasses a new generation of computer systems with enormous capabilities, including new display technologies. These new and emerging technologies integrated with human factors create an interconnectivity that enhances organizational development. This new edition of the handbook addresses developments in the concept of "Control Rooms". It includes modern approaches that emphasize the role of people in learning for self-development and in shaping their work environments.

New in the Second Edition:

- Extensive coverage of the use of the control room and its related computer system outside the work of monitoring and supervising the processes
- Discussion and explanation of how the control room can also be used for the purposes of education and simulation training
- Discussion of the use of the control system for optimizing and developing the existing systems and processes
- A section on new ideas and philosophies about organizational design and job design as these are applied to control room related work
- Proposed organizational designs of the future
- Theoretical background about learning, learning in the workplace, and lifelong learning

Improve Competitiveness and Conserve Resources

Creativity and learning are rapidly becoming integral parts of the design of work environments and work processes and utilize the ICT potential of modern control systems. Using original case studies, the authors describe and illustrate some creative and exciting organizational designs of the future, including new perspectives on learning, learning in the workplace, and lifelong learning. Taking a holistic view, they make a strong argument for integrating the work of the new control centers in the context of society as a whole, including global concerns such as environmental protection, energy conservation, and sustainability.

FEATURES

- Includes coverage that ranges from the basics of ergonomics, the design of control panels, instrumentation, and furniture to the use of large-scale display technology
- Illustrates the simulation of very complex systems to predict future trends and to avoid emergency situations
- Explains how the control room can be used for the development and training of the operators and for re-design of the control system itself
- Uses advanced models for learning at work to improve the operators' and executives' ability to improve their tacit knowledge of the concerned processes
- Covers the human-computer interface system beyond monitoring and supervisory functions

CONTENTS

Introduction: Work in Control Rooms and Models of Control Room Work
 Work in Control Rooms, *Toni Ivergård and Brian Hunt*
 Models in Process Control, *Toni Ivergård and Brian Hunt*
 Design of Information and Control Devices
 Design of Conventional Information Devices, *Toni Ivergård and Brian Hunt*
 Design of Large and Complex Display Systems, *Eric Hénique, Soeren Lindegaard, and Brian Hunt*
 Design of Controls, *Toni Ivergård and Brian Hunt*
 Design of Control Rooms and Their Environment
 Control Room Layout and Design, *Toni Ivergård and Brian Hunt*
 Environmental Factors in the Control Room, *Andy Nicholl*
 Case Studies and Applications
 Industrial Applications and Case Studies, *Erik Dahlquist, Brian Hunt, and Toni Ivergård*

Maritime Application of Control Systems, *Margareta Lützhöft and Monica Lundh*
 The Human Dimension in the Control Room
 The Operator's Abilities and Limitations, *Toni Ivergård and Brian Hunt*
 Learning and Creativity at Work, *Toni Ivergård and Brian Hunt*
 Modelling and Simulation in the Pulp and Paper Industry: Current State and Future Perspectives, *Angeles Blanco, Erik Dahlquist, Johannes Kappen, Jussi Manninen, Carlos Negro, and Risto Ritala*
 System Design: An Overview, *Toni Ivergård and Brian Hunt*
 Conclusions
 Conclusions and Recommendations in Summary, *Toni Ivergård and Brian Hunt*
 Index
